"Thanks to the support of our donors... these twins ... have a chance in life." —staff member in Nicaragua

Meet Nicaraguan twins—DERMAN AND DERMIN

Near the Nicaraguan village of Kamla, our staff encountered Derman and Dermin, severely malnourished twins. "The babies are literally starving to death. I don't think the one will survive, given the conditions," they reported. Realizing the desperate plight of these twins and their young mother, our staff members started providing an ongoing supply of nutritional items.

After several months of taking these nutrients, the difference in Derman and Dermin was remarkable. They gained weight and grew more alert and energetic. Their mother says the first thing they want to do in the morning is eat!

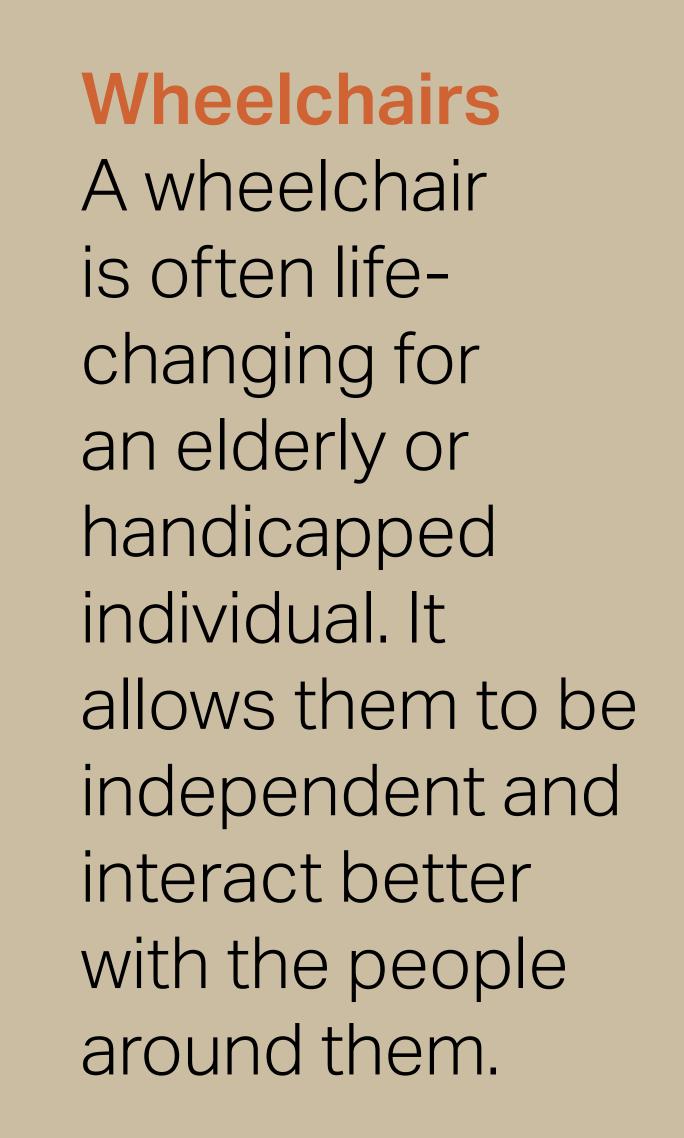

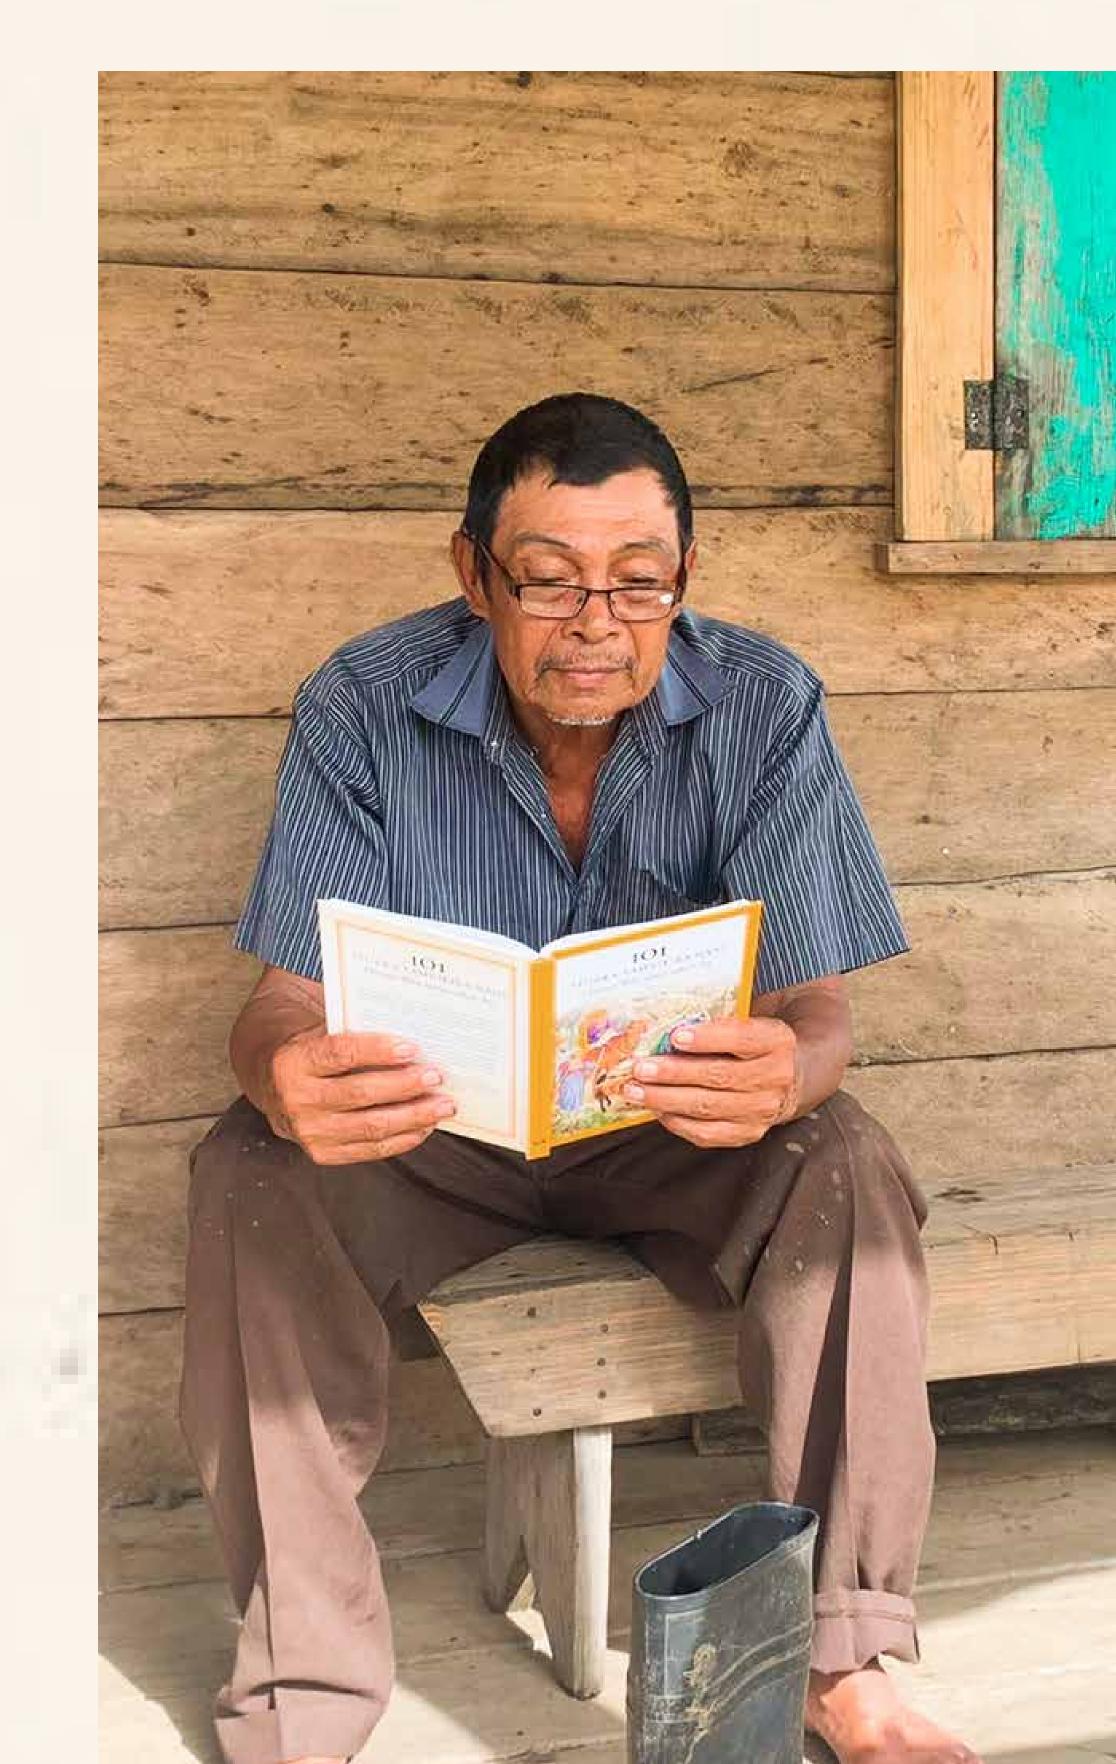

The House for a Poor Family program provides funds to build, purchase, or repair homes.

Favorite Stories from the Bible Some people in Nicaragua have never heard the Gospel. The vivid pictures in the story books help the Bible stories come alive for both children and adults.

Layette bundle

- Hygiene kit
- School kit
- New clothing pack
- These kits are a blessing to children and adults who might not have enough funds to buy the needed supplies.
